* [] Comment. Alexandrovski (fnu) is known as chief of the procurement office in Wuensdorf. []

** [] Comment. Compared with the months from January through March the volume of loadings and unloadings in the 3d Subdistrict of the Berlin Regional Railroad District has decreased in April and May 1952. A daily average of 23 cars were unloaded, and 11 cars loaded, during the period of observation. A daily average of 35 cars were unloaded, and 14 cars loaded, in February and March 1952. This information conflicts with information on the Soviet supply traffic in other districts. It is therefore believed that despite [] statement to the contrary, [] recorded only part of the shipments. For example the motor vehicle exchange program which started during the period under review and affected the entire Soviet zone is not included in this report, although reports on border crossing points indicated that Jueterbog, Kummersdorf and Wuensdorf also received new vehicles []
